

Are you seeing spots in your images? Perhaps it is time for your DSLR to receive some TLC

I offer a sensor cleaning service and while your camera is with me, I tend to a few other areas that may require attention.

The Service:

I non-aggressively clean:

Sensor, Mirror, Mirror Box, Focus Screen and all external optical surfaces, clean and lubricate
Hot Shoe, Lens Mounts and Electrical Contacts.

I supply:

Before and after test images (on your memory card) and a Service Report. Invoice supplied on request.

Reviews on my service can be checked here: <https://www.facebook.com/pg/Gregspics/reviews/>

Price: (from 1 Jan 2019) \$90.00 including 1 lens, \$10.00 per additional lens, 3 day nominal turnaround.
\$110.00 for same day service subject to availability.
\$130 for 3-hour turnaround service subject to availability.
Special price for 3 or more additional lenses on application.

Extra charges may apply for cameras that have been subjected to unusually dirty conditions such as dropped in sand/mud or other unusual environments.

Payment: Cash, Visa or Mastercard on collection or EFT prior to collection.

I need your camera body, 1 lens, a fully charged battery, an empty memory card. (no responsibility accepted for images left on your card).

If you are not sure if your camera needs a sensor clean here is how to check it:

Make a neutral or slightly over exposed image of a section of blue sky at f22, de-focussed in manual focus mode. View the image on your computer, zoom in and if necessary, increase the contrast and adjust the brightness. Contamination on your sensors surface will appear as spots or smears. If any are evident it is time for a clean. Do not leave them, some contaminants can etch the optical surface.

Book in: phone or SMS to **0417 534 061**. Please book in prior to drop off.
